Dear School Board Directors:

Attached is a board governance notice concerning contractor/counsel FERPA mapping, disclosure logs, and reliance quarantine. This notice is a governance, preservation, access-control, and routing concern; it is not a request that the Board review private student data, private family data, personnel data, attorney-client data, work product, or other not-public data.

This notice follows the supplemental correction request sent today as FCEM-RR-002. The governance concern is that District records or decisions reviewed, created, approved, withheld, redacted, validated, or relied upon through unmapped contractor/counsel/nonemployee access should not be treated as clean merits evidence until the District can identify the applicable access basis, annual-notice criteria, legitimate educational interest, direct-control terms, redisclosure limits, and any required access/disclosure accounting.

I also want to politely note that we still are not clear who is currently serving as the acting Responsible Authority, Responsible Authority designee, or otherwise authorized intake/routing official for MGDPA/FERPA access and correction matters during the superintendent transition. We would appreciate clarification of the current acting RA/designee and the correct intake/routing channel so future requests and private-data notices can be directed appropriately.

Please preserve records showing receipt, routing, assignment, review, discussion, response, and follow-up for this notice, including any record identifying the person, office, designee, counsel, administrator, independent reviewer, committee, or other assigned handler responsible for reviewing the governance concern.

Respectfully,
